Work Roles

ABSTRACT

This appendix to the final report of a study on effectiveness in work roles contains nine methodological appendixes that provide the technical details of the measures used in the five-year study. (CE 0 16 655 is the final report.) Appendixes A and B are reproductions of the interview schedules for phases 1 and 2 and appendixes C and D reproduce the question booklets respondents were asked to fill out in phases 1 and 2, respectively. Appendix E depicts the rating scales which supervisors were asked to fill out concerning their subordinates in phase 1. Appendix P does the same for Phase 2. Appendix G spells out the procedures followed by the observers in phase 1 and includes a list of all rating scales employed. Appendix H provides similar information on the observations in phase 2. Appendix I presents the brief interview schedule used in phase 2 for a telephone follow-up of respondents who had left their original employers. (JH)

This study had four general objectives: aspects of working conditions and indicators of employees' work role effectiveness; personal and situational characteristics that limit associations. between working inditions and effectiveness: (3) to begin to map the statistic, the structure of associations among various classes of effectiveness measures, and (4) assess the validity of effectiveness indicators when measured in different ways and tested against different causal factors. Major methodological findings were that information from different sources regarding working conditions and worker behavior in agreement only for relatively unambiguous and external aspects of work. As the abstractness and, thus, potential ambiguity of a measure increase, assessments from workers, observers and supervisors become increasingly liable to judgmental biases. such as the halo effect. Major substantive results include identification of stress effects upon worker attitudes and behaviors, including a withdrawal syndrome that begins with frequent absences and culminates in voluntary turnover 170. ## INTRODUCTION

Volume II of Effectiveness in Work Roles contains nine methodological appendices that reproduce the measures used throughout the study. These appendices are cited frequently in the text of Parts I and II in Volume I, and are intended to supplement the more limited methodological descriptions provided in the earlier volume.

Appendices A and B are reproductions of the interview schedules for Phases I and II, respectively. Appendices C and D reproduce the question booklets respondents were asked to fill out in Phases I and II, respectively. Appendix E depicts the rating scales which supervisors were asked to fill out concerning their subordinates in Phase I. Appendix F does the same for Phase II. Appendix G spells out the procedures followed by the observers in Phase I and includes a list of all rating scales employed. Appendix H provides similar information on the observations in Phase II. Appendix I presents the brief interview schedule used in Phase II for a telephone follow-up of respondents who had left their original employers.

particular, it includes no detailed documentation for data from company records. Available from the authors of this report, but not presented here are codebooks for the records data. These codebooks have separate sections for each site for each phase to take into account idiosyncratic variations in data collection. In addition, Volume II is restricted to

general methodological appendices. It excludes appendices to specific chapters in Volume I, Part I. These appear at the end of the relevant chapters in Volume I.

#### INTRODUCTION

The Survey Research Center of The University of Michigan is studying the working conditions of the American labor force. They are interested in all aspects of people's work: the type of work they do, the pay they get, the problems they face; their satisfaction with their work, and the effect of their work on their physical, social, and economic well-being. The aim of this study is to get information that will help improve the conditions people work under.

The study has the full co-operation and approval of (STUDY EMPLOYER), and only people like yourself can give the information we need. Whether or not you choose to answer any question is completely up to you. Your answers will be kept completely secret and confidential. Information that might identify you will never be seen by anyone at (STUDY EMPLOYER), and it will be seen only by our Survey Research Center staff.

ENTER HERE STARTING TIME OF INTERVIEW:

If you had enough money to live as comfortably we you delike, would you continue to work?

QUESTION CARDS IN THE ORDER IN WHICH THEY ARE GIVEN ARE:

I am given enough time to do what others expect of me.

There is always a great deal of work to be done.

My job gives me a chance to do a task from beginning to end.

I can predict what others will expect of me tomorrow.

I am clear what others expect of me on my job.

On my job, whatever situation arises there are procedures for handling it.

I get enough facts and imformation to work my best. \*

My job requires that I keep learning new things.

I have an opportunity to find out how well I am doing while I am doing my job.

My job requires a high level of skill.

My job requires a lot of mental effort.

I often have to find new ways of dealing with problems.

My job requires that I be creative.

I use the skills and knowledge I learned at school.

My job lets me do a variety of different things.

On my job, people feel that they are constantly being watched to be sure that they obey all the rules.

I rarely find out from anyone whether I've done my job well or not.

My job requires that I do the same things over and over.

I have a lot to say over what happens on my job.

I have enough authority to do my best.

Most people make their own rules on the job.

My job allows me to make a lot of decisions on my own.

My job, is pretty much of a one person job--there is little need for checking or meeting with others.

I have enough freedom as to how I do my work.

I have a lot of control over how well I do m. job.

I am able to complete the work I start.

My job requires me to exert a lot of physical effort.

I am given enough machinery and other equipment to do my best.

124. On pages 7 and 8 of the question booklet there are some pairs of statements.

Please read each pair and check the box next to the statement that you believe most.

QUESTIONS IN ORDER IN WHICH THEY APPEAR IN ANSWER BOOKLET ARE

### I believe that:

a. I can usually make my plans work, if I really try.

ΩR

Good or bad luck usually determines if my plans work.

b. What happens to me is usually my own doing.

OR

I don't have much choice about what happens to me.

c. Becoming a success is a matter of hard work; luck has little or nothing to do with it.

OR

Getting a good job depends mainly on being in the right place at the right

d. People doing jobs similar to mine should be paid according to how well each does his or her job.

OR

People doing jobs similar to mine should all be paid the same.

e. Knowing the right people is important in deciding whether a person will get ahead.

OR

People will get ahead in life if they have the goods and do a good job; knowing the right people has nothing to do with it.

f. People who don't do well in life often work hard, but the breaks just don't come their way.

OR

Some people just don't use the breaks that come their way. If they don't do well, it's their own fault.

g. I have often found that what is going to happen will happen.

OR

Trusting to fate has never turned out as well for me as making a decision to take a definite course of action.

125. (TRUE-FALSE CARD SORT--WHITE/CANARY CARDS) Here are some cards that might describe your life as you see it. Put each card below either the "true" or the "false", card, depending on whether you think the statement is mostly true or mostly false.

(LAY DOWN WHITE CARDS IN FRONT OF R WITH "TRUE" ON R'S LEFT; HAND CANARY CARDS TO R TO SORT. COLLECT CARDS. KEEP UNSORTED CARDS ASIDE.)

QUESTION CARDS IN THE ORDER IN WHICH THEY ARE GIVEN TO R ARE:

- I enjoy having to adapt myself to new and unusual situations.
- I think that any experience is much more significant when shared with a friend.
- I have never deliberately said something that hurt someone's feelings.
- I usually want the person who is in charge of a group I am in to tell me what to do.
- I strongly disliked having to change my plans in the midst of an undertaking.
- I am always courteous, even to people who are disagreeable.
- I prefer independent work to cooperative effort.
- I think that the leaders of organizations to which I belong have every right to expect me to conform to many things.
- I usually change my own opinions when many other people have a different point of view.
- I never hesitated to go out of my way to help someone in trouble.
- I am much more attracted to warm, open people than I am to shy, reserved ones.
- I especially dislike being told by a superior to do something that is contrary to my wishes.
- I often become so wrapped up in something I am doing that I find it difficult to turn my attention to other matters.
- I sometimes feel resentful when I do not get my way.
- If I had to choose between the two, I would rather be considered intelligent that sociable.
- It is important for me to feel that I can run my life without depending upon people who are older and more experienced than I am.
- An expert who doesn't come up with a definite answer probably doesn't know too much.

There have been times when I was quite jealous of the good fortune of others.

- It is a lot more fun to tackle a complicated problem than to solve a simple one.
- A good job is one where what is to be done and how it is to be done are always clear.

Many of our most important decisions are based upon insufficient information.

What we are used to is always preferable to what is unfamiliar.

On occasion I have had doubts about my ability to succeed in life.

Supervisors who hand out vague assignments give a good chance for one to show initiative and originality.

People who insist upon a yes or no answer just don't know how complicated things really are.

There is really no such thing as a problem that can't be solved.

144. BRIEF R ON HIS/HER SUBSEQUENT ON-THE-JOB OBSERVATIONS

#### SUGGESTED BRIEFING:

That finishes our interview for (today/tonight). But one of the main aims of our study is to use different methods to find out about working conditions and what happens to people at work. (Today's/Tonight's) interview will give us one kind of such information about your job.

We will be getting more information by actually watching you a few times as you go about your normal work at (STUDY EMPLOYER). This will help us to understand better the meaning of many of the things you told me (today/tonight).

A few weeks from now somebody else from our Survey Research Center'staff will be at (STUDY EMPLOYER) to look at your working conditions for an hour of so. Then in the days to follow you'll be observed three other times by either the same or a different person.

These won't be interviews. Our staff member won't be there to talk with you but just to look at the sorts of things you do during the day and to look at the layout and working conditions in the part of (STUDY EMPLOYER) where you work. The only talking will be a hello, a goodbye, and maybe the two of you might say a word or two in agreeing that the winter weather in (CITY) is terrible.

The information about where, when, and for whom you work that we already have from '(STUDY EMPLOYER) might happen to be out of date. Because of this, just let me check a couple of things with you.

One of the most important concerns of our study is finding out those working conditions that make people happiest on their jobs and help them to do their jobs as well as they really would like to. For this reason it is very important that we know who is doing well and who may not be working, quite up to par. One of the best ways we can find this out is by asking their supervisors.

As someone who supervises somebody else you can help us a lot by letting us know your personal evaluations of and reactions to each of the people you supervised trectly.

In order to describe (him/her/all or .... iccurately to us, you may need more time than we have (today/tonight).

For this reason we've made up this folder of pages for you to fill out when you have the time. We'd like you to do it in the next week or so and mail it back to us in the prepaid envelope. Supergress of the state of the

The inside cover of this folder tells you how the description sheets should be filled out.

On each sheet just write the name of the person you are describing at the top and fill out the rest of the page.

When you're done, put it in the envelope I gave you and mail it back to us. You don't have to put any stamps on the envelope because it's all prepaid at our end.

I'll give you more pages than you may possibly need--just in case after a second thought you may have forgotten to mention someone you supervise.

## SUGGESTED INTRODUCTION

The Survey Research Center of The University of Michigan is studying the working conditions of American workers. They are interested in all aspects of people's work: the type of work they do, the pay they get, the problems they face, their satisfaction with their work, and the effects of their work on their physical and economic well being.

About a year ago you might have cooperated in a study designed to help improve the conditions under which people work. The study is now being repeated to provide further information that will assist in the achievement of this goal.

Some of the questions that appear unrelated to your job experience are designed to provide information about the impact that outside life experiences have on the reactions to the job, and vice versa. Some questions might appear repetitive to you. They are, however, intended to supply information that will give us as complete and accurate a picture of your job as possible.

Only people like yourself can give us the information we need. Answers to all questions are voluntary and they will be kept completely confidential. Information that might identify you will never be seen by anyone outside the University of Michigan research staff.

70. What is the job title of (your supervisor/the person who lets you know what to do)?

71. Do you supervise anybody as part of your job?

### IF R IS A SUPERVISOR, READ THIS:

One of the most important concerns of our study is finding out those working conditions that make people happiest on their jobs and help them to do their jobs as well as they really would like to. For this reason it is very important that we know who is doing well and who may not be working quite up to par. One of the best ways we can find this out is by asking their supervisors.

As someone who supervises somebody else you can help us a lot by letting us known your <u>personal</u> evaluations of and reactions to each of the people you supervise directly. We will be sending you a folder in the mail sometime in the next few weeks which we'd like for you to fill out and return to us. 73. On pages 4 and 5 of your question booklet there are some statements which might describe your supervisor. Please tell me how true each statement is of him or her by putting a check in one of the columns.

97. Some people are complete involved in their job -- they are abostbed in it night and day. For other people, their job is simply one of several interests. How involved do you feel in your job -- very little, slightly, moderately, or strongly involved?

1. VERY LITTLE

2. SLIGHTLY

3. MODERATELY

4. STRONGLY

3:45

98. Would you say you work harder, less hard, or about the same as other people doing your type of work?

5. WORK HARDER

3. ABOUT THE SAME

1. WORK LESS HARD

3:46

99. How often do you do some extra work for your job which isn't required of you? Would you say you do this often, sometimes, rarely, or never?

4. OFTEN

3. SOMETIMES

2. RELY

1. NEVER

3:47

100. On page 6 of your question booklet there are some statements that might describe the way that you react to your job. Please tell me how true each statement is of your reactions to the job by putting a check in one of the columns.

R'S RATINGS OF HIS/HER REACTIONS TO THE JOB IN THE ORDER THEY ARE GIVEN ON PAGE 6 OF THE QUESTION BOOKLET ARE LISTED BELOW.

RESPONSE ALTERNATIVES ARE: VERY TRUE, SOMEWHAT TRUE, A LITTLE TRUE, NOT AT ALL TRUE

- a. On my job the harder I work the better I do
- b. I can do my job well if I work hard
- c. I get a feeling of personal satisfaction from doing my job well
- d. I feel badly when I do a poor job
- e. I usually put a lot of effort and energy (either physical or mental) into my work
- f. In general I try to do quite large quantities of work
- g. In general I try to do quite high quality work
- h. I live, breathe, and eat my job
- i. The most important things that happen to me involve my job

- k. I look forward to being with my co-workers these days
- 1. When things go badly, I try to stay  $\rho$ away from my supervisor
- m. My job makes me feel tense

On some jobs machines or other people pretty well determine how fast one must work. On other jobs it is up to the employee to decide how fast he/she will work. How much control do you have over your work pace? Would you say you have no control, a little control, some control, or a lot of control over the speed at which your work?

1. NO CONTROL

2. A LITTLE CONTROL

3. SOME CONTROL 4. A LOT OF CONTROL

3:48

102. On page 7 of your question booklet there are some things listed that could happen when you do your job especially well. For each, please make a check in the column that best indicates how likely you think it is that each may happen when you do your job well.

R'S RATINGS IN THE ORDER THEY ARE GIVEN ON PAGE 7 OF QUESTION BOOKLET ARE LISTED BELOW.

RESPONSE ALTERNATIVES ARE: CERTAIN, VERY LIKELY, SOMEWHAT LIKELY, NOT AT ALL LIKELY

- a. I will be offered a better job at the place where I work
- b. I will get a bonus or a pay increase
- c. I will be more secure in my present job
- d. I will feel better about myself as a person
- e. I will have to do more work
- f. I will be given better equipment to work with
- g. I will develop my skills and abilities
- h. I will get a feeling of worthwhile accomplishment
- i. My co-workers will criticize me

103. On page 8 of your question booklet are some words and phrases which ask you how you see yourself in your work. For example, if you think that you are very "successful" in your work put a check in the box right next to the word "successful." If you think that you are not at all successful in your work put a check in the box right next to the words "not successful." If you think you are somewhere in between, put a check where you think it belongs. Put a check in one box on every line. Please read each line carefully before you check the appropriate box in that line.

121. (PERSONALITY SORT--WHITE/YELLOW CARDS) Here are some cards that might describe your life as you see it. Put each YELLOW card below the WHITE card that best reflects how true each of these descriptions is of you.

LAY DOWN WHITE CARDS IN FRONT OF R WITH "VERY TRUE" ON R'S LEFT; HAND YELLOW CARDS TO R TO SORT. COLLECT CARDS. KEEP UNSORTED CARDS ASIDE.)

QUESTION CARDS IN THE ORDER IN WHICH THEY ARE GIVEN TO R ARE:

- 16 If I had to choose between the two, I would rather be considered intelligent than sociable.
- 17 It is important for me to feel that I can run my life without depending upon people who are older and more experienced than I am.
- 18 An expert who doesn't come up with a definite answer probably doesn't know too much.
- 19 A good job is one where what is to be done and how it is to be
- 20 What we are used to is always preferable to what is unfamiliar.
- 21 I prefer independent work to co-operative effort.
- 22 I think that the leaders of organizations to which I belong have every right to expect me to conform to many things.
- 23 I think that any experience is much more significant when shared with a friend.
- 24 I am much more attracted to warm, open people than I am to shy, reserved ones.
- 25 I especially dislike being told by a superior to do something that is contrary to my wishes.
- 26 I usually want the person who is in charge of a group I am in to tell me what to do.

129. BRIEF R ON HIS/HER SUBSEQUENT ON-THE-JOB OBSERVATIONS

#### SUGGESTED BRIEFING:

That finishes our interview for (today/tonight). But one of the main aims of our study is to use different methods to find out bout yorking conditions and what happens to people at work. (Today's/tonight's) interview will give us one kind of such information about your job.

We will be getting more information by actually watching you a few times as you go about your normal work at (STUDY EMPLOYER). This will help us to understand better the meaning of many of the things you told me (today/tonight).

A few weeks from now somebody else from our Survey Research Center staff will be at (STUDY EMPLOYER) to look at your working conditions. Then in the days to follow you'll be observed one or two other times by either the same or a different person.

These won't be interviews. Our staff member won't be there to talk with you but just to look at the sorts of things you do during the day and to look at the layout and working conditions in the part of (STUDY EMPLOYER) where you work. The only talking will be a hello, a goodbye, and maybe the two of you might say a word or two in agreeing that the weather in (CITY) is terrible.

The information about where, when, and for whom you work that we already have from (STUDY EMPLOYER) might happen to be out of date. Because of this, just let me check a couple of things with you.

GO TO PAGE 2 OF COVER SHEET AND ASK QUESTIONS 11-15.

ON-THE-JOB OBSERVATION MATERIALS

INCLUDING OBSERVER INSTRUCTIONS AND REPORTING FORMS

PHASE I

#### OBSERVATION INSTRUCTIONS

The observation period will take one hour and will be followed by approximately 15 minutes of editing. The hour is divided into three parts:

1. Familiarization observations 10 min.

2. Specific observations 30 min.

. General observations 20 min.

. The observation period will start after you introduce yourself to the person who is to be observed.

#### INTRODUCTION

Points to be covered in introduction if this is the employee's first observation.

- 1. Your name.
- 2. The fact that you are part of the UM/SRC team working on the study at the worker's place of employment.
- 3. A reminder to the employee that this is the first of the periods of on-the-job observation that the interviewer told him/her about.
- 4. That everything is confidential and that no information identifying individuals will be seen by the worker's employer.
- 5. That you will be watching the type of work the employee does for about an hour and also looking at the physical surroundings.
- 6. That the employee should go on doing whatever he/she was doing when you entered.
- 7. That you don't expect anyone to be working all the time so if the employee is due for a break, wants to make a phone call or talk to the people he/she works with, he/she should go ahead and do so. In short, he/she should regard you as part of the furniture.
- 8. That after about ten minutes or so you may be asking the employee some questions about what he/she is doing so you can understand better what is going on.

If this is the employee's second observation, the introduction may be briefer. Acquaint the employee with who you are and why you are there. Tell him/her that you will be doing exactly what the previous observer did. Reemphasize the confidential nature of the observation. Reiterate points 6 and 7 from the Introduction above.

In describing this study to the person to be observed, do not use the study name. Call the study "the Survey Research Center study of conditions of work."

### Familiarization Observations -- 10 min.

During the first 10 minutes of observation observe the job to get some understanding of what is going on. Toward the end of the period you may ask the person being observed questions to clarify the nature of what he is doing, the location of materials he works with, who his supervisor is, etc. After you have asked your questions begin the period of specific observations.

During the entire observation period try to be as unobtrusive as possible. One problem you may run into is that the person being observed goes somewhere that he or she does not want you to follow (i.e., into the bathroom, or to have an evaluation session with their supervisor). If you are asked not to follow, please do not. However, the time which you are not observing should not be considered as part of the observation period: the observation period should be extended for that length of time.

Another problem is that the unobtrusive may mean reducing the ease with which you can view the Jean In this case you will have to find a place which balances the degree to which you are an obstruction to work, against the accuracy of your observations. However, if you have to make a choice stay out of the way, even if it means that you cannot observe as well. It may be that the person being observed can help you find a place which is out of the way, but where you can see the job.

### Specific Observations -- 30 min.

During this period you are to observe the person's job carefully. Using the work sheets provided you are to record the "work chunks" that describe the person's job, and the interactions which occur during the observation period. In recording the work chunks, remember that you can aggregate chunks into larger chunks during the editing period when you transfer the data to part D of the rating booklet, but you can not break chunks down at that point. Please err in the direction of being too specific, not the direction of being too general.

Do not forget to record the starting and ending times of the period of specific observations on the work sheets. During the editing period these should be transferred to the observation rating booklet.

### General Observations -- 20 min.

During this period you do not have any specific observations to make. You are to continue observing the job to develop your impression of it. During this period fill out the scales in part A of the observation rating booklet. Try to answer every question. Use the "don't know" option sparingly.

The "dangerous conditions" section of the observation booklet has been changed since the training period. There is now a list of dangerous conditions. You should respond to each item in the list. There should be no "DKs" in this section. If you do not observe a condition, code it as absent in the space provided. The other codes are similar to the one, you are familiar with.

In the control section of the observation rating booklet, and in any control type questions elsewhere, remember that there should be no "DKs". If you do not observe or infer control then it should be considered as absent. Also, you should only rate control for people or things which have relatively direct control over the job, For example, customers necessary for any job, since otherwise it would not exist, but unless they exercise this control directly (as on a salesman) or relatively directly (as in the case of the chef where the only intermediates were the waitresses), they should be considered as having no control.

Remember in rating the how true scales that these are scales of the degree to which the characteristics exist on the job.

### Ending the Observation Period

After you have finished part A, if there is still time left during the observation period you may continue to parts B and C.

When the period of observation is over, let the person being observed know that you are leaving, and thank him. At this time ask the person if the job you have observed is typical of the job which he usually does. You will need this information to complete the last part of section D at the back of the observation rating booklet.

#### Ed1ting

Find a place where you cancedit your observations. During this period transfer your information from the work sheets to part D of the observation rating booklet, and finish parts B and C if you have not already done so.

Please go through the booklet and be sure that all of the respondents are clearly marked, and that all the questions which you have not answered are appropriately coded. The appropriate coding instructions for Inapplicable codes are given in the Observation Rating Booklet. Other items which are not answered should be coded "DK". - "DK" codes should be used sparingly.

Also be sure the employee number is coded in the appropriate boxes on the face sheet of the booklet, and that the cover sheet is filled out.

138

After you have done all this, the only thing left is to turn your observation rating booklet, the observation work sheets, and the cover sheet in to Marci.

If you have any questions, problems, or suggestions, please get in touch with us (764-0286) or come and see us (5081 of ISR). We vould rather have questions than errors.

Thank you and Good Luck (which I hope you won't need).

PHASE II

# JOB OBSERVATION TRAINING SESSIONS October 19-20, 1974

#### Introduction

The primary purpose of these sessions is to train individuals to correctly use the standardized observation guide. This instrument is designed to help observers collect standardized data related to the psychological dimensions of jobs.

Two groups of individuals will be going through the training. A group of approximately 15 observer-candidates are being prepared for work on the "Effectiveness in Work Roles" project of the Survey Research Center. Their observations of individual jobs will be part of a larger study of workers and jobs in 3 different organizations. The observational data will complement other data collected from worker interviews, company records, and supervisory ratings. A second group is composed of 3 permanent staff members of the Institute for Social Research who are conducting job observations in conjunction with a project involving the assessment of organizational change in a pharmaceutical company located in a southern state. Both groups will be going through the same training.

In addition to these two groups of participants, other staff members from the Institute for Social Research will be visiting the training room during the weekend for the purpose of observing the training sessions and the specific technology used here.

#### . Activities

The majority of the two days will be spent using the observation guide to rate video-tapes of jobs which are similar to those which will eventually be observed. These ratings will be discussed by the participants and the training staff. The basic approach to be used here is experiential, with the underlying assumption that the best way to train observers is by having them do observations and get feedback on those observations. The sessions will run from 9:30 to 4:30 on Saturday and 9:00 to 3:00 on Sunday.

#### SELECTED CORE DIMENSIONS OF JOBS

VARIETY

- the extent to which the job provides the individual with the opportunity to do a number of different things, using different equipment, materials, or procedures, as opposed to doing the same things over and over again.

**AUTONOMY** 

- the extent to which the job allows the indivi.'ual to feel personally responsible for a meaningful portion of the work by providing him/her
with some say about how the work will be done,
freedom to determine what will happen on the
job, or discretion in the cours; of performing
the job.

INTERNAL FEEDBACK

- the extent to which the job provides the individual with information about how he/she is doing; the degree to which just doing the job itself provides information about the quality and/or quantity of job performance.

TASK IMPACT

- the extent to which the tasks performed as part of the individual's job make a visible change in relation to some ultimate product or service; the degree to which the worker makes a visible transformation and the degree to which that transformation is visible in the final product.

TASK COMPLETENESS

- the extent to which the job enables the individual to produce an entire product or service; a job which involves a very clear cycle of perceived closure--a distinct sense of a beginning and ending of a transformation process, with clearly visible and identifiable outcomes.

REQUIRED SKILLS

- the extent to which adequate performance of the job requires specialized skills, training, or preparation beyond what an average individual could obtain in under 3 months.

CERTAINTY

 the extent to which the performing of the job involves highly predictable events and behavior as opposed to events or demands which cannot be anticipated.

CONFLICTING DEMANDS

- the extent to which the normal task performance puts the individual in situations where different people or tasks put demands on him/her at the same time.

SECONDARY DIMENSIONS

- related to other parts of the job or job environment; includes factors such as resources, interaction, hazards, work interruptions, etc.

# Introduction

This booklet is provided as a guide and data recording form for the standardized observation of job characteristics. It is designed to be used by observers who have been trained in its use. The guide is set up in the same order as the different timed phases of the observation. For each part of the observation guide, read the instructions and provide the appropriate information.

The major parts of the observation guide are as follows:

Part	Activity	Time Allotted	for Each Part
		Minimum	Max imum
I	Introducing yourself to the indi- vidual being observed and orienting yourself to the job.	5 minutes	15 minutes
II	General observation	15 minutes	45 minutes
Ш	Structured observation of the job		15 minutes
IA	Rating the job		15 minutes
٧	Administrative information	)r == == == ==	
YI.	Editing (to be done away from the job)		

# USE THIS SPACE FOR NOTES

Part I. Introducing yourself to the individual being observed and orienting yourself to the job. (5 - 15 minutes)

OBSERVERS SHOULD BE WEARING THEIR SRC ID BADGES AS THEY BEGIN OBSERVATIONS. THE INDIVIDUAL WILL NORMALLY HAVE BEEN NOTIFIED AHEAD OF TIME THAT HE/SHE 1S GOING TO BE OBSERVED.

HAVING LOCATED THE EMPLOYEE, WAIT UNTIL A LOGICAL BREAK POINT IN THE EMPLOYEE'S WORK AND INTRODUCE YOURSELF. IN YOUR OWN WORDS, YOU SHOULD CONVEY THE FOLLOWING INFORMATION.

- 1. Your name and SRC/UM affiliation.
- 2. What the study is.
- Reminder of the previous interview.
- 4. Stressing of confidentiality and anonymity.
- Brief explanation of what you will be doing.
- 6. Emphasizing that employee should continue with normal behavior.
- 7. Identify supervisor and co-workers.
- 8. Warning of possible interruption in 5-10 minutes.

AFTER HAVING ORIENTED YOURSELF TO THE JOB, YOU MAY ASK THE EMPLOYEE ONE OR IWO QUESTIONS TO CLARIFY WHAT YOU ARE OBSERVING. IN MOST CASES THERE SHOULD BE NO NEED TO ASK ANY QUESTIONS. QUESTIONS SHOULD BE ASKED ONLY IN CASES WHERE IT IS UNCLEAR WHAT THE EMPLOYEE IS DOING (FOR EXAMPLE, IF EMPLOYEE IS WORKING ON A MATERIAL OR OBJECT OR WITH A MACHINE THAT IS UNINTERPRETABLE BY THE ORSERVER). REMEMBER, IHIS IS NOT AN INTERVIEW. ONLY ASK THOSE QUESTIONS THAT ARE ABSOLUTELY ESSENTIAL TO UNDERSTANDING WHAT THE EMPLOYEE IS DOING.

### Part II. General observation (15 - 45 minutes)

THIS PERIOD SHOULD BE SPENT OBSERVING THE WORKER AND THE JOB TO GET A FEEL FOR THE GENERAL CHARACTERISTICS OF THE JOB AND THE SPECIFIC DEMANDS AND OPPORTUNITIES IT PROVIDES FOR THE WORKER. THE PURPOSE OF THIS PERIOD IS TO GET A GENERAL ORIENTATION TO THE JOB BEFORE MOVING ON TO THE MORE STRUCTURED OBSERVATION AND RATING TASKS.

THIS GENERAL OBSERVATION PERIOD WILL VARY IN LENGTH DEPENDING ON THE TYPE OF JOB BEING OBSERVED. THE PERIOD SHOULD BE NO LESS THAN 15 MINUTES AND NO MORE THAN 45 MINUTES.

# Part III. Structured Watching

- A. AFTER OBSERVING THE JOB FOR WHAT YOU JUDGE TO BE AN ADEQUATE PERIOD (MINIMUM OF 15 MINUTES), ANSWER EACH OF THE FOLLOWING QUESTIONS, WRITING IN THE APPROPRIATE INFORMATION.
  - 1. Does the employee repeat any activity or group of activities during the normal course of his/her work (are there any identifiable cycles)?
    - [1] YES [2] NO (if no, skip to next question and mark a to d "NA") $\setminus$

- a. Describe the largest identifiable and repeated cycle.
- b. Describe the identifiable sub-parts of the largest cycle.

c. What is the approximate length in time of the largest cycle?

Time

d. How "regular" are the cycles? Describe to what extent they vary in length, type of activities done, sequence of activities, etc.

What tools, machinery, or pieces of equipment does the employee work with during the normal course of his/her work activities?

3. Does the employee's normal work involve working with automatic machines or equipment? (exclude hand tools or hand held power equipment, e.g., hand held drills, electric screwdrivers, etc.)

[1] YES [2] NO (if no, skip to next question and mark a to d "NA")

101:22

a. Does the pace of the employee's work activities appear to be controlled or constrained by the equipment he/she is working with? If so, how?

b. How much control does the employee seem to have over the activities of the machines or equipment he/she works with? Give examples.

- 4. Does the employee's normal work involve working with or on some type of material or object -- where a central part of the employee's job involves moving, working on, or is some way changing the material or object?
  - [1] YES [2] NO (if no, skip to next question and mark a to c "NA")

- a. From where does the employee get his/her "raw materials" (materials or objects to be worked on)?
- b. What does the employee actually do with the material or object (what is the transformation process)?
- c. When the employee finishes working on the material or object, where does it go or where does he/she take it?
- 5. Does the employee's normal work involve dealing with other people for work related purposes?
  - [1] YES [2] NO (if yes, how many in a specified time period 101:25 and in general what types of people)

6. What kinds of skills or learning appear to be necessary to perform the job adequately? (skills above and beyond what the average high school graduate could be expected to have coming in off the street)? List the skills

7. Does the employee relate to, refer to, depend on, or work from any oral or written instructions during the normal course of his/her work activities? (including such things as specification sheets, manuals, blueprints, etc.)?

[1] YES [2] NO (1f yes, 11st)

101:26

8. Does the employee record any information (on paper, blackboard, etc.)?

[1] YES [2] NO (if yes, indicate what seems to be recorded, how, and where)

B. FOR EACH OF THE FOLLOWING STATEMENTS, CHECK THE NUMBER INDICATING HOW MUCH YOU AGREE WITH THE STATEMEN AS A DESCRIPTION OF THE EMPLOYEE'S JOB.

WHILE STILL OBSERVING THE JOB, RATE THE JOB BY CHECKING THE APPROPRIATE RESPONSE TO THE ITEMS IN THE FC LOWING SECTIONS OF THIS BOOKLET.

A. CHECK THE NUMBER ON EACH OF THE FOLLOWING SCALES WHICH MOST APPROPRIATE DESCRIBES THE JOB YOU ARE WATCHING.

1. How much variety is there in the job?

101:42

[1] [2] [3] [4] [5] [6]

Very little; the individual does pretty much the same things over and over, using the same equipment and procedures almost all the time

Moderate variety

Very much; the individual does many different things, using a wide variety of equipment and/or procedures

[7]

2. How much <u>autonomy</u> is there in the job? That is, to what extent does the job permit the individual to decide by <u>himself/herself</u> how to go about doing the work?

101:43

[1] [2] [3] [4] [5] [6] [7]

Very little, the job gives him/ her almost no personal "say" about how and when the work is done

Moderate autonomy; many things are standardized and not under his/her controls but he/, she can make some decisions about the work

Very much; the side job gives him/her almost complete responsibility for deciding how and when the work is done

3. How much does the job involve the individual producing an ontire product or an entire service?

[4]

101:44

[1] [2]

. .

[3]

[5]

[6]

[7]

The job involves doing only a small part of the entire product or service; it is also worked on by others or by automatic equipment and he/she may not see or be aware of much of the work done on the product or service

The job involves doing a moderate sized "chunk" of the work; while others are involved as well, his/her contribution is significant

The job involves producing the entire product or service from start to finish; the final outcome of the work is clearly the results of his/her work

How much does the work that the individual does on his/her job make a <u>visible impact</u> on the materials or objects being worked on or service being rendered?

[1]

[2]

[3]

[4]

[5]

[7]

[6]

None at all; it is hard to tell what impact his/her work makes on the object or service

A moderate amount

A great amount; his/ her work is clearly visible, it makes a noticeable difference in the materials, objects, or service

To what extent does <u>doing the job itself</u> provide the individual with information about his/her work performance? That is, does the actual work itself provide clues about how well he/she is doing--aside from any "feedback" co-workers or supervisors may provide?

101:46

[1]

[2]

[3]

[4]

[5]

[6]

٢7٦

Very little; the job itself is set up so he/she could work forever without finding out how well he/she is doing

Moderately; sometimes doing the job provides "feedback" to him/her; sometimes it does not Very much; the job
'is set up so that
he/she gets almost
constant "feedback"
as he/she works about
how well he/she is
doing

How intellectually demanding is the job?

101:47

[1]

[2]

[3]

[4] · [5]

.[6].

[6]

[7]

Not at all, the Job is very routine and does not require any mental effort

Moderately

Extremely, the job is very, non-routine and involves a lot of "thinkingthrough" or problem solving

To what extent does the job require the use of sophisticated or complex skills or knowledge.

101:48

[1]

[2]

 $\cdot$ [3]

[4]

[5]

. [7]

Very little; no skills are required that the average person would not already have

Moderate, some skills are required, but they would not be difficult for the average person to obtain in a short time (3 months)

Very much; highly complex or sophisticated skills are needed to do the job

To what extent does the job require the individual to work closely with other people (either "clients," or people in related jobs within the organizations)?

101:49

[1]

[2]

[3]

[4]

[5]

[6]

Very little; dealing with other prople is not at all necessary in doing the job

Moderately; some dealing with others 1s necessary

Very much: dealing with other people is an absolutely essential and. crucial part of doing the job

[7]

9. How much uncertainty is there in the job?

101:50

[1]

[2]

[3]

[4]

[5]

[6]

[7]

Very little; the individual almost always knows what to expect and is never surprised by something happening unexpectedly on the job

Moderate uncertainty

Very much; the individual is almost never sure what is going to happen; unexpected things frequently happen

- B. DURING THE NORMAL WORK ACTIVITIES OF THE INDIVIDUAL, HOW OFTEN DOES THE INDIVIDUAL INTERACT VERBALLY WITH THE FOLLOWING INDIVIDUALS?
  - 1. His/Her supervisors
  - 2. His/Her co-workers (at the same level of the organization as the individual)
  - √3. His/Her co-workers (at different levels of the organization from the individual)
    - 4. Others (customers, clients, patients)
    - 5. Unidentifiable individuals (can't tell who they are)
